Contents of Volume 20

No. 1, June 1994

Rapid in situ assessment of physiological activities in bacterial biofilms using fluorescent probes
F.P. Yu, G.A. McFeters (USA) 1
Use of a 3H-labeled substrate to measure microbial biodegradation in marine waters
T.J. Boyd, A.F. Carlucci (USA) 11
Autofluoresecence detection of *Escherichia coli* on silver membrane filters
S.A. Glazier, H.H. Weetall (USA) 23
14C-labelling of cell wall of group B streptococci and optimization of protoplast formation by mutanolysin
N.B. Takaisi-kikuni (Zaire) 29
Purification of type 5 capsular polysaccharide from *Staphylococcus aureus* by a simple efficient method
F.B. Gilbert, B. Poutrel, L. Sutra (France) 39
Increased itraconazole antifungal activity by agar diffusion test
F.D. D'Auria, N. Simonetti, V. Strippoli (Italy) 47
Determination of absolute configurations of 2- and 3-hydroxy fatty acids in organic dust by gas chromatography-mass spectrometry
W. Gradowska, L. Larsson (Sweden) 55
Tuberculostearic acid as a means of estimating the recovery (using dispersion and differential centrifugation) of actinomycetes from soil
S.J. Macnaughton, A.G. O'Donnell (UK) 69

No. 2, July 1994

A novel method for detecting acetylglucosaminidase activity on polyacrylamide gels
S.P. Lincoln, T.R. Fermor, D.A. Wood (UK) 79
Improved rapid method for production and purification of *Clostridium perfringens* type A enterotoxin
N.L. Heredia, J.S. Garcia-Alvarado, R.G. Labbé (Mexico, USA) 87
Use of a cyanobacterium as a particulate tracer for terrestrial subsurface applications
F.S. Colwell, P.A. Pryfogle, B.D. Lee, C.L. Bishop (USA) 93
Evaluation of mineral agar plates for the enumeration of hydrocarbon-degrading bacteria
J.D. Randall, B.B. Hemmingsen (USA) 103
Effects of polymyxin B on the outer membranes of *Aeromonas* species
R. Maruvada, S.C. Pal, G.B. Nair (India) 115
Polymerase chain reaction-based diagnosis of mollicute infection of commercial animal sera
O. Dussurget, A. Henry, B. Lemercier, D. Roulland-Dussoix (France) 125
A biological assay for the sensitive and quantifiable detection of extracellular microbial DNases
G. Basse, M.G. Lorenz, W. Wackernagel (Germany) 137
A new procedure for the reduction of uronic acid containing polysaccharides
T. Fontaine, B. Fournet, Y. Karamanos (France) 149
Announcement 159

No. 3, September 1994

Purification of DNA from estuarine sediments
C.R. Lovell, Y. Piceno (USA) 161
Production of extracellular proteases from *Staphylococcus aureus* strain V8 in dialysis culture
R.A. Lincoln, J.A. Leigh (UK) 175
Purification and molecular analysis of microbial DNA from compost
M. Malik, J. Kain, C. Pettigrew, A. Ogram (USA) 183
Improvements in the extraction of bacterial ATP from soil with field application
S.J. Pangburn, M.S. Hall, F.R. Leach (USA) 197
A spectrophotometric method for monitoring tactic responses of bacteria under anaerobic conditions
K. Nealson, D. Saffarini, D. Moser, M.J. Smith (USA) 211
Biofilm thickness measurements by variance analysis of optical images
T. Lauvvik, R. Bakke (Norway) 219
Fractionation of *Leuconostoc mesenteroides* NRRL B-512F dextran sucrase by polyethylene glycol: a simple and effective method of purification
A. Goyal, S.S. Katiyar (India) 225
Announcements 233

No. 4, May 1994

PCR fingerprinting for epidemiological studies of Staphylococcus aureus
A.v. Belkum, R. Bax, P.J.C. van der Straaten, W.G.V. Quint, E. Veringa (The Netherlands) 235
A novel rapid procedure for the isolation of outer membrane proteins from Campylobacter jejuni
O.M.J. Flynn, I.S. Blair, D.A. McDowell (Ireland) 249
Determination of bacterial cell number and cell volume by means of flow cytometry, transmission electron microscopy, and epifluorescence microscopy
M. Heldal, S. Norland, G. Bratbak, B. Riemann (Norway, Denmark) 255
Improved method to detect trace amounts of gases in a carbon dioxide atmosphere
V. Vandepitte, F. Houwen, W. Verstraete (Belgium) 265
A modified method of quantitative colorimetric DNA-DNA hybridization on membrane filters for bacterial identification
K.-D. Jahnke (Germany) 273
A quantitative method to study co-adhesion of microorganisms in a parallel plate flow chamber: basic principles of the analysis
R. Bos, H.C. van der Mei, J.M. Meinders, H.J. Busscher (The Netherlands) 289
